WORK EXPERIENCE

HCL, Hyderabad, India
Associate web Developer   *30th March 2017 – 15th March 2019*

- Worked as a web Developer on "RISK MANAGEMENT INFORMATION SYSTEM" project. This project helps the risk managers, account holders, agents, and client employees with information about their policies, claims, outstanding invoices.
- Developed Java MVC modelled enterprise applications using HTML5, CSS3, JavaScript, jQuery, and RESTful Web Service.
- Well versed in Scrum Agile Methodology involving design, development, documentation, unit testing, used TortoiseSVN for code version management and project management tools like JIRA for process and issue tracking.
- **Used**: REST API, MySQL 5, Bootstrap 3, jQuery, AJAX, Java 6, and JIRA.

EDUCATION:

Dalhousie University, Halifax   *GPA: 3.3/4.0*
Master of Engineering in Internetworking*, Sept 2018 – May 2020.*

Institute of Aeronautical Engineering, Hyderabad
Bachelor of Technology in Electronics and Communication Eng.*, Sept 2013 – May 2017*   GPA: 3.3/4.

MY PROJECTS

Meal finder:
A website which is designed to find meals based on ingredients, gives you whole recipe by fetching data from meal DB database using API. You can access this website at: https://mavullu-surya-raghava-nallamatti.github.io/Meal_search_api/.

Shopping List:
A website which is designed to capture and organize your shopping list the moment they pop in your head. You can delete them once you bought your item. Very basic and user friendly.

Sign Up Website:
A Website showcases all the details of the product. Welcomes the customers to sign up to know more updates or alerts about the products. It was created in React framework using JSX, JavaScript, Html, CSS, Git, and NodeJS.

Portfolio website:
I built my own four portfolio websites to let recruiters know about me which include basic Html, CSS, JavaScript and React. Website: https://mavullu-surya-raghava-nallamatti.github.io/portfolio/

Countdown website:
A Completely JavaScript and react based countdown website to new year 2021.
Website: https://mavullu-surya-raghava-nallamatti.github.io/projects/

Board Games: made games like snake, pong using Python and visual studio IDE.

Static Websites: websites like counter, quiz, to-do list and Random number generator been developed using JavaScript in React Framework.

Soft and specific Skills:

- I like working at fast paced, significantly evolving workspace.
- Committed to meet reasonable deadline/sprints.
- I am active in product discussions, influence the roadmap and end user experience.
- Effective interpersonal, Team player and Excellent communication skills (verbal and written).
- Collaborate, creative to plan and deliver compelling user-facing products from start to finish
- Plan, design, write, modify, integrate, and test Web-site related code
- Conduct tests and perform security and quality controls

Extra-curricular Activities:

- Won 2nd place in Arduino Mobile Robotics workshop conducted at Institute of Aeronautical Engineering in association with ICSRDL – CENTRAL.
- Participated in plantation drive (**Haritha haram**) conducted by Telangana government.
